(54) POWER DEVICE FOR ELECTRIC MOTOR CAR

(57)Abstract:

PROBLEM TO BE SOLVED: To fit a power device for an electric motor car which uses a solar battery, to a car in an optimal state.

SOLUTION: The power device for the electric motor car is the one that charges a battery by a power-generation power, of a solar battery, and supplies power to a drive motor of the car from the battery. Along with arranging the modularized solar battery on the upper part of the car, the battery is arranged in the lower part of the car, and a lead wire led out from the car rear part side of the solar battery is laid around in the rear part of the car, and is connected to the battery.
